- 24K gold-plated plug
- 3 earbud sizes

BDH440

Bell'O Digital headphones sound great, fit comfortably in your ear, and most importantly are built to last. Our designers and engineers are not only avid users of headphones, but are dedicated to creating products that elevate the quality of your music. Understanding the importance of durability, sound quality, and lightweight comfort is not just our job, it's our active everyday passion.

Sound comes alive

The acoustics have been carefully designed for dimensional sound localization. Vocals and instruments come alive as if the musicians were right in front of you. Our advanced frequency tuned speaker driver produces warm, solid bass at low volume levels and astounding deep, powerful bass when turned up.

Neodymium Speaker Magnets

Lightweight neodymium magnets provide the largest, permanent, magnetic capacity by weight. These magnets optimize the reaction time of the speaker drivers, providing superior sound quality and extended life.

Lightweight design using low mass metal and polymer construction

1. 3 sizes of soft, durable silicone earbuds - providing solid bass and noise isolation
